Comar 7P.i. Commercial Swing Doors

Comar Architectural Aluminium Systems are pleased to launch its next generation of commercial swing door sets. By taking the extensive range of solutions from its market leading Comar 7 Door range and coupling this with their trade-marked Comar Pi (polyamide insulation), the new Comar 7Pi Commercial Door offers even lower U-values housed in robust profiles for high traffic areas.

Safety and user friendly solutions are offered in the Comar 7Pi Commercial Door, with aesthetically pleasing round anti-finger trap stiles, that ensures safety for fingers on its hinge stile and thresholds that cater for DDA compliance.

Security concerns are alleviated as the doors have been extensively tested to PAS24, offering compliance with the very latest security specifications. As such, a range of locking options are available which include single or multi-point with Axim flush-bolts.

The Comar 7Pi Swing Doors are available in single or double configurations with options for double action open-in and open-out. The doors can be hung from the market leading range of Axim concealed closers, which offer mechanical back-check with hold or no hold-open options.

Automatic options are catered for with integration into Comar's extensive range of existing framing and auto door beams.
